📍 Hyderabad, India

Motivated third-year B.Tech Computer Science student aspiring to become a Software Development Engineer. Strong foundation in Python programming and full-stack web development using React, with hands-on experience in building real-time web applications. Possesses strong problem-solving skills, is a quick learner, and adapts rapidly to new technologies while continuously improving coding skills.

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering CVR College of Engineering, Hyderabad

- CGPA: 8.29

Projects

Restaurant Management System — Web-Based Project – HTML, CSS, JavaScript, PHP, MySQL 2024

- Built a web-based restaurant management system used by **3+ user roles** (admin, staff, cashier) to manage daily operations.
- Implemented **10+ CRUD features** including menu management, order tracking, and bill generation using PHP and MySQL.
- Reduced order processing time by **40%** through database-driven workflows and optimized queries.
- Designed a fully responsive UI supporting **mobile, tablet, and desktop** devices with smooth front-end and back-end integration.

BharatVerse: An Interactive Digital Ecosystem for Living Indian Culture — Full-Stack Web Project – React.js, Node.js, Express, MongoDB, HTML, CSS, JavaScript 2025

- Developed a full-stack platform featuring **5+ interactive modules** covering festivals, and regional content.
- Integrated **real-time content updates** using REST APIs, improving page data refresh speed by **35%**.
- Implemented dynamic UI components using React.js, reducing manual page reloads by **100%**.
- Designed a scalable backend with Node.js and MongoDB capable of handling **100+ content records** efficiently.
